purchased

Development and production of extruded, molded, assembled products and OEM medical devices that meet the diverse needs of medical and pharmaceutical partners.

Tubes

High technical specialization allows the production of a 100% customized product by combining different configurations of diameters, materials and lengths.

Components

The catalogue includes a wide range of products. HMC offers also customized components, building molds to meet customers' needs.

OEM medical device

As a CDMO (Contract Development and Manufacturing Organization), HMC supports its partners throughout the entire process, from product development to packed and sterilized devices.

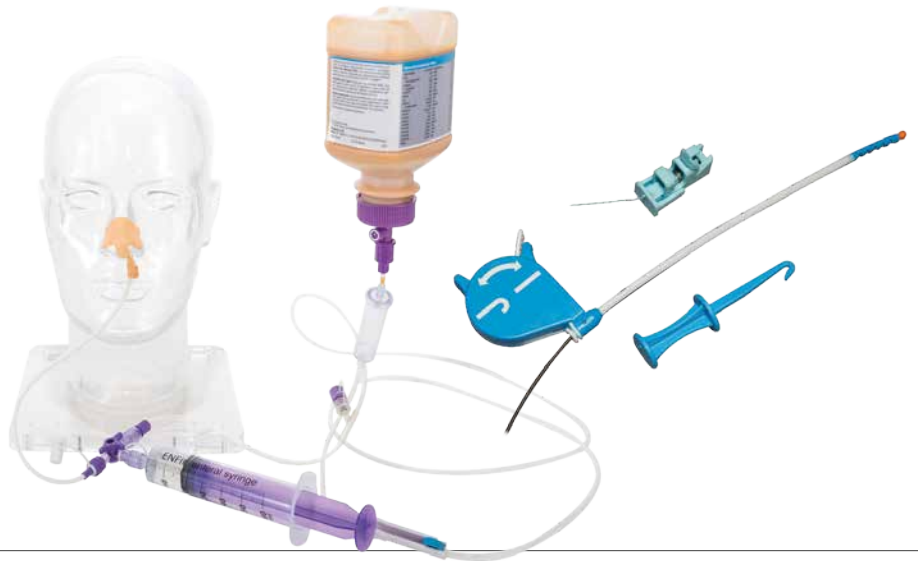

**WE SHAPE
YOUR DEVICE**

Development and production of branded medical devices, which are distributed to healthcare services worldwide.
